CONTENTS TO VOLUME 46

PART 1 AUGUST 1991

Electron-acoustic instability driven by a field-aligned hot electron beam. R. BHARUTHRAM 1

Weyl's theorem for magnetohydrodynamics. G. P. ZANK 11

Nonlinear surface Alfvén waves. N. F. CRAMER 15

Magnetic field intensification and formation of field-aligned current in a non-uniform magnetic field. H. MURATA 29

Drift instability in the presence of a parallel electric field and an inhomogeneous magnetic field: particle aspect analysis. M. S. TIWARI and P. VARMA 49

Numerical simulations of BGK modes. L. DEMEIO and J. P. HOLLOWAY 63

Instability of intensely propagating circularly polarized electromagnetic pulses in a two-component plasma. R. E. KATES and D. J. KAUP 85

Scattering of electromagnetic waves by hybrid waves in a two-electron-temperature plasma. S. K. SHARMA and S. SUDARSHAN 99

Parametric instabilities of circularly polarized large-amplitude dispersive Alfvén waves: excitation of parallel-propagating electromagnetic daughter waves. A. F. VIÑAS and M. L. GOLDSTEIN 107

Parametric instabilities of circularly polarized large-amplitude dispersive Alfvén waves: excitation of obliquely-propagating daughter and side-band waves. A. F. VIÑAS and M. L. GOLDSTEIN 129

Bistability of a forced hydromagnetic cavity. L. NOCERA and E. R. PRIEST 153

A physical description of magnetic helicity evolution in the presence of reconnection lines. A. N. WRIGHT and M. A. BERGER 179

PART 2 OCTOBER 1991

Scattering of circularly polarized electromagnetic waves off a straight electron beam propagating along a constant magnetic field. A. BOGDANOV 201

Theory of nonlinear interaction of particles and waves in an inverse plasma maser. Part 1. Collision integral. V. S. KRIVITSKY and S. V. VLADIMIROV 209

Theory of nonlinear interaction of particles and waves in an inverse plasma maser. Part 2. Stationary solution and evolution of initial distributions. V. S. KRIVITSKY and S. V. VLADIMIROV 219

On the decay of a dipole pump wave to half-harmonics. J. A. HEIKKINEN, T. J. H. PÄTTIKANGAS and G. DEVILLERS 231

Observations of low-frequency oscillations during relativistic-electron-beam–plasma interactions. A. S. PAITHANKAR and G. P. GUPTA 237

On the existence of ion-acoustic double layers in negative-ion plasmas. S. BABOOLAL, R. BHARUTHRAM and M. A. HELLBERG 247

A generalization of the Taylor constraint to the advection of axi-symmetric poloidal magnetic fields. P. A. WATTERSON 255

Analytical solutions for the current driven by a rotating magnetic field in a spherical plasma. P. A. WATTERSON 271

Parametric excitation of surface waves in a strongly inhomogeneous plasma. G. BRODIN and J. LUNDBERG 299

The effect of cosmic rays on the instability of a tangential discontinuity. S. V. CHALOV 309

Modulational instability produced by Alfvénic turbulence in a collisionless plasma. H. HAMABATA 319

Plasma maser theory of the extraordinary mode in the presence of Langmuir turbulence. S. N. SARMA, K. K. SARMA and M. NAMBU 331

Space-dependent quasi-linear theory of lower-hybrid waves. E. CANOBBIO and R. CROCI 347

PART 3 DECEMBER 1991

Kinetic theory of cross-modulation in a weakly ionized plasma. A. J. M. GARRETT 365

Convection in a plasma with opposed temperature and density gradients. L. NOCERA 391

Resistive tearing-mode instability in a current sheet with equilibrium viscous stagnation-point flow. T. D. PHAN and B. U. Ö. SONNERUP 407

Magnetic fluctuations and kinetic equations in a two-species plasma. A. DI VITA 423

Resistive evolution of a force-free plasma to equilibrium. A. S. GILL and E. W. LAING 437

Amplification of nonlinear surface waves in an inhomogeneous transition layer. G. BRODIN and O. M. GRADOV 459

Low-frequency instability excited by a mesh grid in a double-plasma device. J. CHUTIA, S. SATO, H. KUBO and Y. NAKAMURA 463

Guiding-centre orbits for particles in cross-field devices. S. RIYOPOULOS 473

An exact formula for the thermal and particle diffusivities based on the diffusive transport model in tokamak plasmas. C. JANICKI 487

General dispersion relation for surface waves on a plasma–vacuum interface: an image approach. G. W. ROWE 495
